Sport is an important part of today's society and plays a large role in people's lives. Now more than ever sport events dominate headlines and athletes have become national heroes.

From a social standpoint, sport plays a positive role in uniting people from different social backgrounds in support of their favourite team. However, just as sport unites

people so it can divide them, as is often demonstrated by crowd violence at football matches.

Sport is also an important part of every child's schooling, as it plays a big role in their physical and mental development. It teaches children how to work as part of a team and co-operate with others, while at the same time improving their physical condition. The only drawback to this is that children who are less able to perform well in sports are likely to feel inadequate in comparison to their more gifted classmates, which may affect their self-confidence.

From an economic point of view, sports can be very profitable, as it attracts a lot of advertising.
